

LLM RESPONSE QUALITY EVALUATION REPORT

Project : LLM Response Quality Evaluation System

Evaluation Mode : Batch Evaluation

Total Responses : 4

Generated : 07-08-2026 19:28:38

Executive Summary

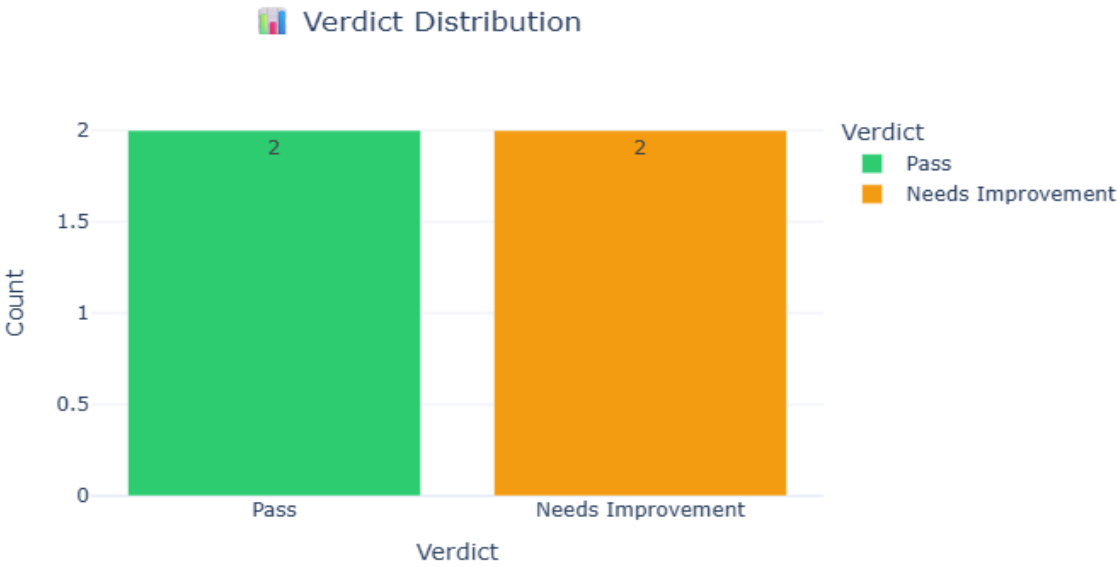

Metric	Value
Total Evaluations	4
Pass	2
Needs Improvement	2
Fail	0
Average Accuracy	51.5
Average Relevance	82.5
Average Hallucination	100.0
Average Completeness	98.75
Average Overall Score	83.25

Evaluation Methodology

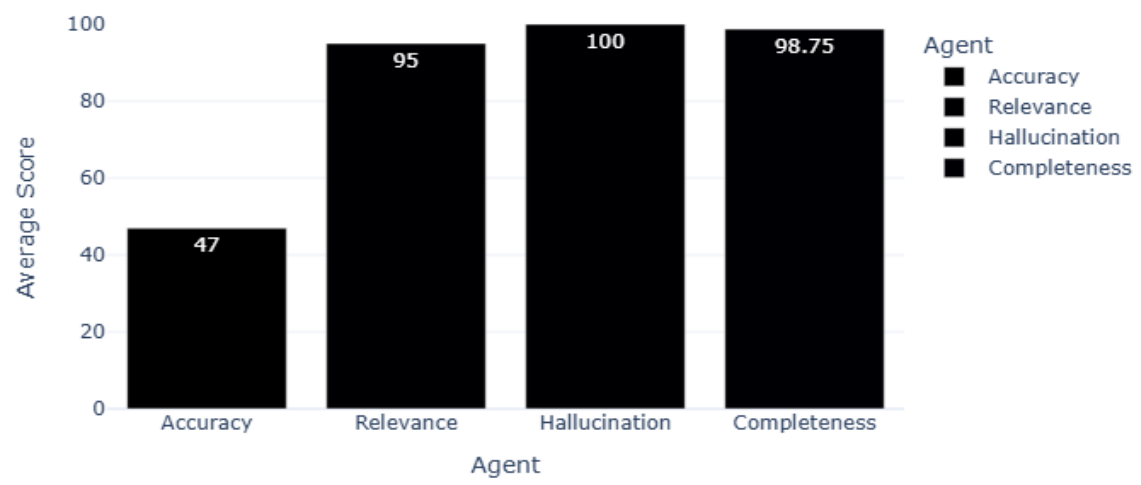

The LLM Response Quality Evaluation System evaluates AI-generated responses using multiple quality dimensions. The system processes a batch of questions and corresponding AI responses and assigns scores based on predefined evaluation criteria.

Step	Description
1. Input Collection	Questions and AI-generated responses are provided to the system.
2. Reference Retrieval	Relevant reference information is retrieved for evaluation.
3. Response Evaluation	The response is evaluated using multiple quality dimensions.
4. Score Generation	Individual scores are generated for Accuracy, Relevance, Hallucination and Completeness.
5. Overall Evaluation	The individual scores are combined to generate an overall score.
6. Verdict Generation	The response is classified as Pass, Needs Improvement or Fail.
7. Report Generation	Results are presented through dashboard visualizations and a PDF report.

Flagged Responses

Question: Does shaving make hair grow back thicker?

Overall Score: 75

Verdict: Needs Improvement

Batch Insights

Best Performing Response

Question: What is Artificial Intelligence?
Overall Score: 100
Verdict: Pass

Lowest Performing Response

Question: Do humans swallow spiders while sleeping?
Overall Score: 60
Verdict: Needs Improvement

Batch Metric	Result
Total Evaluations	4
Pass Responses	2
Needs Improvement	2
Failed Responses	0
Average Accuracy	51.5
Average Relevance	82.5
Average Hallucination	100.0
Average Completeness	98.75
Average Overall Score	83.25

Question: Do humans swallow spiders while sleeping?
Overall Score: 60
Verdict: Needs Improvement

Batch Insights

Best Performing Response

Question: What is Artificial Intelligence?
Overall Score: 100
Verdict: Pass

Lowest Performing Response

Question: Do humans swallow spiders while sleeping?
Overall Score: 60
Verdict: Needs Improvement

Batch Metric	Result
Total Evaluations	4
Pass Responses	2
Needs Improvement	2
Failed Responses	0
Average Accuracy	51.5
Average Relevance	82.5
Average Hallucination	100.0
Average Completeness	98.75
Average Overall Score	83.25

Improvement Recommendations

- Improve factual accuracy using reliable reference datasets.
- Reduce hallucinated responses through better retrieval.
- Increase answer completeness for complex questions.
- Validate generated responses before final scoring.
- Continue monitoring evaluation consistency across batches.

Conclusion

This report summarizes the evaluation of **4** AI responses using four judge agents: Accuracy, Relevance, Hallucination, and Completeness.

Average Overall Score: **83.25**

Pass Responses: **2**

Needs Improvement: **2**

Failed Responses: **0**

The evaluation platform successfully generated dashboard visualizations, detailed evaluation reports, and recommendations for improving AI response quality.
