

LLM RESPONSE QUALITY EVALUATION REPORT

Project	LLM Response Quality Evaluation System
Evaluation Mode	Batch Evaluation
Total Responses	4
Generated On	18-08-2026 09:58:24

This report presents the automated evaluation of AI-generated responses using Accuracy, Relevance, Hallucination and Completeness evaluation metrics.

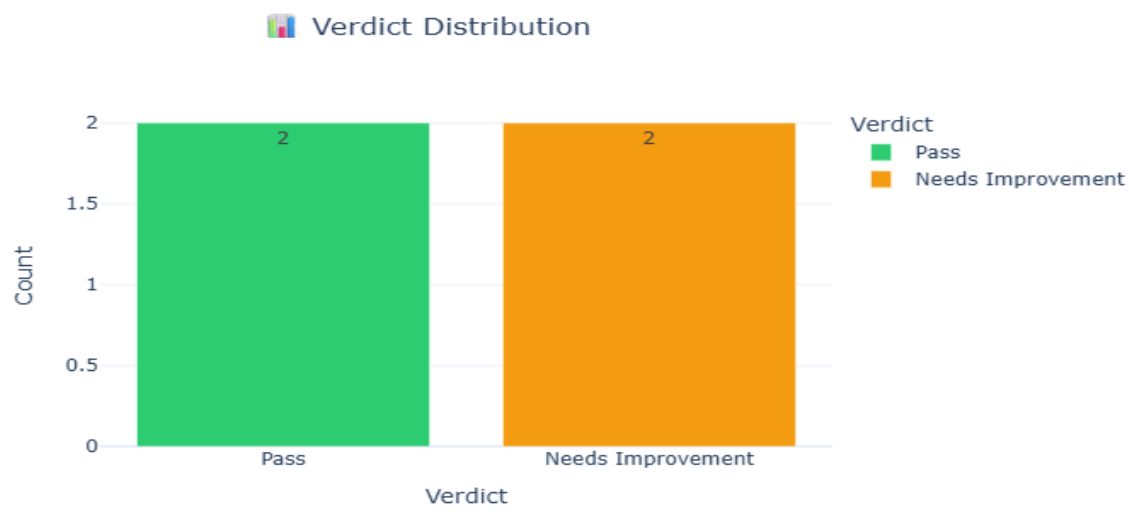

Executive Summary

Metric	Value
Total Evaluations	4
Passed	2
Needs Improvement	2
Failed	0
Average Accuracy	49.0
Average Relevance	97.5
Average Hallucination	100.0
Average Completeness	98.75
Average Overall Score	86.25

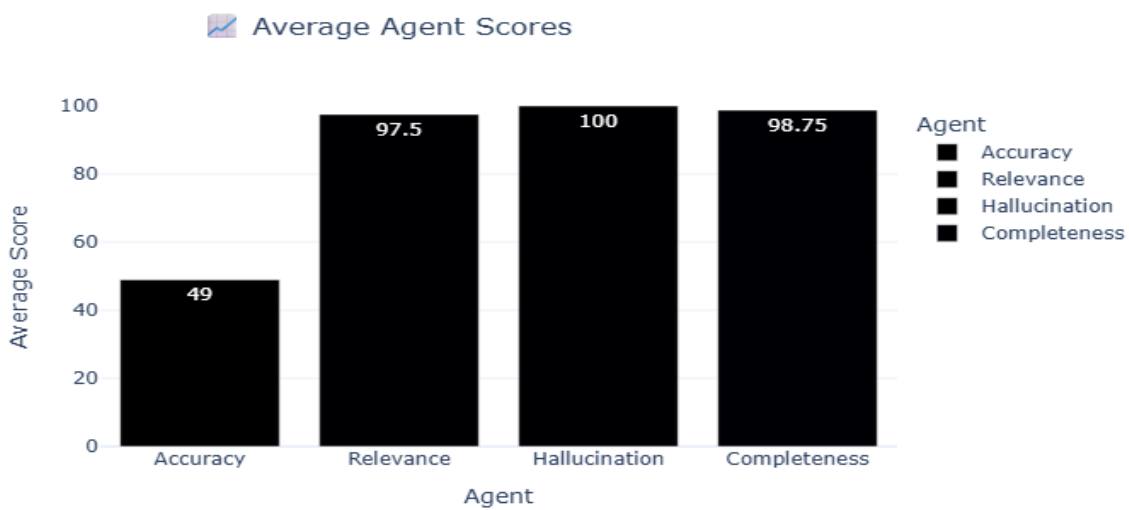

The system evaluated **4** AI-generated responses. A total of **2** responses passed the evaluation, **2** required improvement and **0** failed. The average overall evaluation score was **86.25**.

Individual Evaluation Results

Question	Acc	Rel	Hall	Comp	Overall	Verdict
Can machine learning algorithms be biased?	98	100	100	95	98	Pass
What is Artificial Intelligence?	98	100	100	100	100	Pass
Does shaving make hair grow back thicker?	0	100	100	100	75	Needs Improvement
Do humans swallow spiders while sleeping?	0	90	100	100	72	Needs Improvement

Flagged Responses

Question: Does shaving make hair grow back thicker?

Overall Score: 75

Verdict: Needs Improvement

Question: Do humans swallow spiders while sleeping?

Overall Score: 72

Verdict: Needs Improvement

Improvement Recommendations

- Improve factual correctness of AI responses.
- Reduce hallucinated or unsupported statements.
- Improve completeness of generated answers.
- Validate responses using trusted reference information.
- Improve response accuracy for low-scoring questions.
- Continue monitoring evaluation consistency.

Conclusion

The LLM Response Quality Evaluation System successfully evaluated **4** AI-generated responses.

Evaluation Summary

Passed: **2**

Needs Improvement: **2**

Failed: **0**

Average Accuracy: **49.0**

Average Relevance: **97.5**

Average Hallucination Score: **100.0**

Average Completeness: **98.75**

Average Overall Score: **86.25**

The system provides a structured approach for evaluating AI responses using multiple quality dimensions including Accuracy, Relevance, Hallucination and Completeness.
